

PALLET LIVE STORAGE (Pallet Flow Racking)

Solutions for medium to large sku's from FiFo to LiFo

'Jay' Live storage racking for palletised loads are compact structures that normally incorporate roller track sections placed on a sloped lane to allow pallets to slide over them.

Pallet live storage enables perfect rotation of stored products, with the FIFO (First-in, First-out) system, where the first pallet to be put in is the first pallet to be taken out.

'Jay' Pallet Live Storage

Applications

- Manufacturing Areas
- Stores & Warehouses
- Finished Goods area
- Raw material & WIP Area

Advantages

- ➔ Store a variety of sku's on different levels of lanes for easy access.
- ➔ Upto 400% more selectivity than drive-in racks.
- ➔ Maximizes space utilization with last-in-first-out inventory control.
